

GRAPHITE

- Graphite electrodes
- Carburisers
- Graphite products
- Slotting electrodes

Premise in Bystrice – headquarters and production facilities

Premise in Trinec-Konska – production and storage facilities

FERROALLOYS

- Ferroalloys in lumps
- Briquetted ferroalloys

JAP TRADING, s.r.o. was established in 1993. At present the company employs more than 90 employees and its annual turnover of more than 40 million EUR is made up mainly by the output of its own production.

BRIQUETTING AND PELLETIZATION

- Fly-ash briquettes
- Pellets

Trading and manufacturing activities are focused on graphite electrodes and other graphite and carbon products, ferroalloys, refractory linings, insulation fibrous lining and other metallurgical and foundry materials.

An integral part of the company strategy is the development of new metallurgical technologies which are the result of long-term research in ferrous and nonferrous metallurgy. Key production programmes include antioxidant impregnation of graphite electrodes and other graphite products, processing of fly-ash from electric arc furnaces, ladle furnaces and converters and briquetting and pelletizing of ferroalloy, graphite and other fines.

OTHER PRODUCTS

➤ Refractory materials and linings

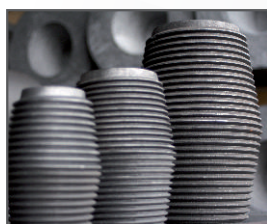

- Refractory materials for linings of metallurgical units
- Insulation rice chaff
- Repair material MgO
- Insulation boards
- Insulation monoblocs
- Olivine
- Magnolite
- Backfill sand

➤ Metallurgical raw materials and semi-finished products

- Chromite sand
- Piece aluminium
- Steel and cast iron granulate

➤ Other products

- Grinding discs
- Nickel electrodes

Graphite electrodes nipples

Graphite carburiser

Briquettes

Insulation rice chaff

Graphite electrodes

Fly-ash pellets
